# To Correspondents

---

I take pleasure in presenting herewith my twelfth annual Catalogue and Price-List.

It has been my endeavor, to list, as much as possible, only the very best and most satisfactory of both Fruit and Ornamental Trees and Plants. Whatever I am not able to grow on my own grounds, I procure from the most reliable Nurseries. My Nursery is located between Fifth Avenue and Center Street, about four blocks northwest from West End Station, San Rafael.

I warrant all trees and plants, to be healthy, and true to label, but having no control over them, after delivery, I do not GUARANTEE them to live and thrive, nor will I replace them, except any tree or plant should prove untrue to name; but in no case will I be liable for any sum greater than the original purchase-price.

My customers are requested to notify me immediately of any error, that may have occurred in filling their order, so that the same may be rectified, as I desire to give satisfaction to all, who favor me with their order.

All orders delivered free in San Rafael and Ross Valley; a small charge for packing, to cover cost of material, will be made for all orders shipped by express or freight. All articles are at the risk of the purchaser, after being shipped.

Orders from unknown correspondents must be accompanied by cash or satisfactory reference. All bills payable first of the month.

# Conifers

Coniferous Trees are the grandest trees in existence. A good many of them are natives of the Pacific Coast, therefore at home in our climate. Though the most expensive varieties are of rather slow growth, until well established in the ground, they will grow into the finest specimen trees for the lawn in a few years. Prices are for plants, measuring 1 to 3 feet. Quotations for larger plants on application.

PLANTING SEASON: October to March.

# Evergreen Trees and Shrubs

Broadleaved Evergreens vary in size from the largest trees to the smallest shrubs; unlike the coniferous Evergreens, whose flowers are insignificant, most of these excel in brilliancy and floriferousness, others through their shining berries and foliage. These plants give our California garden, and Parks their distinctive feature.

## Iris

Irish germanica, commonly called German Iris, Flag-Lilies or Fleur de Lis, are amongst the most desirable and easiest grown of our spring flowering plants. The flowers fairly outrival the orchids in delicacy of structure and wide range of coloring. They are particularly adapted to our California climate, if planted in a well drained sunny location, requiring very little water during the summer. Avoid planting too deep and fresh manure.

### NEW INTRODUCTIONS

My collection of new Irises, planted at the P. P. Int. Exp. at San Francisco, 1915, received a Diploma of Merit.

# Hardy Perennials

Herbaceous plants are indispensable for filling out and planting amongst shrubbery, in the rock gardens, for the old-fashioned perennial border, etc. Most varieties, after once planted, will live and bloom without much attention, for many years. Prices are for field grown or transplanted seedling plants.

## PLANTING SEASON:

October to March, as early as possible, whenever the soil is in good condition.
